Projects

Vee – Space Exploration & AI Chatbot App | Mar 2025 – Present (Ongoing)

Developed immersive Flutter mobile app integrating NASA APIs (APOD, Mars Rover, ISS Tracker) with voice-to-text AI chatbot via OpenRouter (Gemini/Mistral LLMs). Implemented real-time tracking, responsive UIs, and Firebase backend for user data; supports cross-platform (iOS/Android).

TaskApp – Service-Based Job Marketplace | Dec 2024 – Mar 2025

Engineered Flutter app for providers/takers with Google Maps integration, Arabic RTL support, and backend APIs (Node.js/MongoDB/AWS) for bookings/payments. Handled full MVP cycle: auth, real-time notifications, and testing; deployed to 20+ beta users with 40% faster navigation.

Digital Card – E-Commerce Shopping App (Alsaif Gallery-Inspired) | Sep 2024 – Dec 2024

Built seamless Flutter e-commerce flows: product catalogs, cart/checkout, and dynamic image/category navigation with Node.js/MongoDB backend. Optimized for sub-2s loads across devices; integrated AWS for scalable deployments and payment processing.

Gradex – Online Exam & Admin Dashboard App | Jan 2024 – Apr 2024

Created Flutter/Firebase app for secure exams, scoring, and admin panels with real-time syncing and user analytics. Focused on secure auth, responsive design, and data privacy; tested for 100+ simulated sessions.

ScheduleEase – Online Scheduling Web System | Mar 2022 – Jun 2022

Developed full-stack web app (HTML/CSS/JS/PHP) for automated bookings, calendar management, and notifications. Improved user efficiency by 50% through intuitive UI and database-driven automation.
